

Special Edition MEGA PACK

BASE NUTRIENT

Solo•Tek™ Bloom 3-8-8 / Grow 6-3-7

Revolutionary one-part nutrient

Unique, one part suspensions the Solo•Tek products offer concentrated and complex formulas to keep plants growing through all stages. With both Grow and Bloom option, growers are able to tailor their base nutrient to focus on lush vegetative growth or explosive flower development. These products provide all primary nutrients and other essential nutrients. Both formulas also contain organic compounds such as kelp to work in conjunction with the mineral base for additional plant benefits. These concentrated products are great for vegetable and flower gardens, containers, shrubs and trees, houseplants and exotics.

SUPPLEMENTS

Bloom Fuel™ 0-0-2

Flowering solution

Bloom Fuel™ is a flowering supplement that designed to be used with your regular fertilizer program. The main component in Bud Fuel is potassium, which comes from different sources. Potassium is required to help plants produce stronger stems and is essential in transporting sugars produced by photosynthesis. Use on all indoor and outdoor flowers, fruits, and vegetables.

Monster Bloom™ 0-50-30

A plant fertilizer to help blooming

A classic bloom enhancer, Monster Bloom™ has gained a reputation for its ability to assist plants during the middle stages of flower development. The high concentration of phosphorous encourages blooming and plays a vital role in plant metabolism. The potassium in the formula improves bloom and fruit quality while impacting photosynthesis, assisting starch production within the plant. Monster Bloom is very concentrated and should be phased out prior to the last two weeks of flowering. This will ensure the plant has the opportunity to metabolize all the power locked within Monster Bloom. The result will be a flavourful and abundant crop. Monster Bloom is a supplement and should be used as part of a complete fertilizer program.

VitaMax Plus™ 1-1-2

Plant anti-stress formula

VitaMax™ is specially formulated to improve plant growth, encourage blooming and assist floral and fruit development. It contains macronutrients and added magnesium to aid in the formation of chlorophyll and other essential plant compounds. Always use VitaMax Plus as a part of your regular fertilizer program. Use with every watering up until the last 10 days of crop growth and then discontinue use. Be sure to soak the soil or media completely when using the VitaMax Plus solution.

Blossom Blaster™ 0-39-25

Abundant flower development

Blossom Blaster™ provides available phosphorous to improve root development and aid in blooming and fruiting. Potassium is instrumental in moving sugars produced by photosynthesis. This powerful flowering supplement should be added twice during the initial 3 weeks of flowering. Blossom Blaster™ is effective in all growing mediums and is compatible with all base nutrients. Do not use as a foliar spray. Always use fresh product. Do not add to existing solutions.

Heavy Bloom™ 0-1-2

Increases weight and density

Heavy Bloom™ is a complex blend of plant essentials designed to provide nutrition and energy to plants during the key stages in flower and fruit development. The nutrients in this formula play an irreplaceable part in the activation of enzymes systems fundamental to the production of proteins, sugars and the management of plant energy and water balance within the plant. The nutrients provided by Heavy Bud ensure early plant growth, good plant turgor and more uniform crop maturity. Use this product on all indoor and outdoor flowering plants.

Vegetative Growth Booster™ 8-39-0

Vigorous Vegetative Growth

Formulated to encourage early and vigorous growth, Vegetative Growth Booster™ is an excellent supplement for growing plants. High nitrogen supports green growth while phosphorous supports photosynthetic energy production. The phosphorous also works to increase the metabolism of carbohydrates and aid in root development. Vegetative Growth Booster is designed to be a one-time application product prior to the onset of flower development.
